

What We Do

We regularly survey all Humboldt and Del-Norte physicians to see if they are interested in mentoring, or allowing observation/shadowing opportunities for local students. Through surveying we have developed extensive grids for each education level, educators, and program directors to coordinate efforts for students going into medicine.

The opportunities we are currently involved with:

- Observing / Shadowing
- Mentorship / Mock Interviews
- Career Panels
- Lectures / Presentations
- Career guidance / Career Fairs
- Educational guidance
- Exposure to different aspects of medicine
- Future Physician Scholarship Fund / Other grant funded sources

HUM PET is committed to building pipelines into Medicine.

Interested?

For Students:

Though our partners, we try to provide opportunities directed towards your interests. To get involved, work with the identified liaison at each level.

For Educators:

Please do not hesitate to reach out for information on the contact liaison to help identify opportunities available to students.

HUMBOLDT DEL-NORTE PREMEDICAL EDUCATION TASK FORCE (HUM PET)

BUILDING PIPELINES
INTO MEDICINE

Dedicated to educating students from elementary/middle school, high school, junior college and universities in their path to medical school in hopes that the students will want to return to Humboldt-Del Norte when they've completed their training.

In partnership with Cal Poly Humboldt

Cal Poly Humboldt offers multiple opportunities for students as they complete their undergraduate degree.

CIRM:

California Institute of Regenerative Medicine (CIRM) trains students in stem Cell Biology and Regenerative Medicine.

BIOL482:

Supervised Internship Class offered to Junior and Senior students that offers an opportunity to get experience and demonstrate their interest in a healthcare career and allows Cal Poly Humboldt PreMedical students to earn course credit by shadowing in clinical settings

Paid Summer Internship Program:

A paid opportunity that offers students valuable opportunities to observe and shadow professionals in the medical industry throughout the summer.

PreMedical Society:

We connect members with local physicians for speakers, educational discussions, career fairs, and many other opportunities. Encourage the leadership of pre-med society to attend some social events and meetings with physicians.

Instruction done by Dr. Connor with the Summer Internship Program

2023 CPH

Summer Internship Program

Health Careers Exploration Summer Institute (HESI)

Geared towards high school students, HESI provides various activities to allow students to gain soft skills and gain experience on available careers in the health field. In connection with the Humboldt County Office of Education (HCOE) and the Del-Norte Office of Education (DNOE), we aid in connecting students with physicians.

Providence St. Joseph Family Medicine Residency

With the goal of producing fully competent physicians capable of providing high quality care to their patients by preparing residents with full-spectrum training and the skills, knowledge, and attitudes necessary to be competitive candidates for family medicine physician positions.

Medical Schools

Collaboration with medical schools that have Rural Rotation Programs. We help connect students locally depending on interests to help recruitment efforts to our area.
